Dam Removal And Reoperation In An Age Of Complex Hydrosystems
by
Dr. Desiree Tullos

Thursday, Feb. 15, 2018 | 1:00-2:30 PM | Toyota Auditorium | Howard Baker Center

Desiree Tullos is a professor in the Biological and Ecological Engineering Department at Oregon State University. She earned her bachelor's and master's in civil engineering and her PhD in biological engineering. Her research team investigates the interactions between river engineering and the physical and biological processes of rivers. Projects focus on questions that range from the particle to basin scale, with the emphasis on the sustainable management of water resources.
